Bengaluru, Karnataka | +91-9538118708 | pruthvi.r0006@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, HTML/CSS
Backend & Web:	FastAPI, Django, Flask, REST APIs, WebSockets, Daphne ASGI, React, Next.js
AI & Automation:	RAG Pipelines, FAISS Vector Search, Gemini API, Groq LLM, n8n, Slack App Webhooks
Cloud & Databases:	PostgreSQL, SQLite, Neon Serverless Postgres, AWS (EC2/S3), Docker, Redis, Git, GitHub Actions, Pytest

PROFESSIONAL EXPERIENCE

Freelance AI Automation Engineer <i>Coresium (Contract)</i>	Apr 2026 – May 2026 Remote
- Developed custom Python integrations and automated data pipelines using n8n, streamlining core business operations. - Connected external REST APIs, ensuring transactional data integrity, security, and high processing speeds. - Implemented validation and monitoring scripts to improve workflow reliability and reduce system downtime.	
Python Full Stack Intern <i>PyGenicArc</i>	Feb 2025 – May 2025 Remote
- Led a 4-member intern team in building a Python-based web application, coordinating Agile sprints and final presentation. - Architected and developed 'DailyDrop', a relational e-commerce platform implementing product catalogs, cart management, and role-based access control. - Built backend modules, database migrations, and secure REST API integrations using Flask and SQLite.	

PROJECTS

Event-Driven GitHub Automation Bot	GitHub Live Demo
- Built an event-driven bot (Next.js + FastAPI + PostgreSQL) processing GitHub webhook events asynchronously using built-in BackgroundTasks. - Engineered robust security using HMAC-SHA256 signature checks, event deduplication (X-GitHub-Delivery), and action-level checks for idempotency.	
Real-Time Face Detection Streaming System	GitHub Live Demo
- Developed a low-latency video streaming system using FastAPI WebSockets and React to capture and render annotated video feeds. - Streamed frames dynamically to backend for face detection, tracking regions of interest (ROI), and JPEG frame-render encoding via MediaPipe.	
AI-Powered PDF Intelligence Tool (InsightPDF)	GitHub Live Demo
- Architected a RAG platform enabling semantic search across PDF documents utilizing FastAPI, Next.js, and FAISS indexing. - Enhanced response relevance by combining vector-based similarity retrieval with Gemini LLM generation, citing source pages directly.	
Zyra – Social Media Backend Scaling	GitHub Live Demo
- Scaled a Django application using Daphne ASGI, Redis channels for WebSockets, PostgreSQL, and Pytest coverage. - Implemented asynchronous feed fan-out algorithms, local cache validation checks, and real-time presence trackers.	

EDUCATION

Master of Computer Applications (MCA)	Jain University, Bengaluru	CGPA: 8.45 / 10	2025 – 2027
Bachelor of Computer Applications (BCA)	Bits Hi-Tech College, Chitradurga	CGPA: 8.07 / 10	2022 – 2025

CREDENTIALS

Meta Full-Stack Developer Specialization — Coursera	Acquired: 2025
