Professional Summary

Python Backend Developer specializing in FastAPI, Flask, AI-powered applications, and scalable backend systems. Experienced in building REST APIs, WebSocket services, RAG-based document intelligence platforms, and automation solutions. Passionate about developing production-ready applications that combine modern backend engineering with AI.

Technical Skills

Backend: Python, FastAPI, Django, Flask, REST APIs, WebSockets, Async Python

AI & Data: RAG Pipelines, FAISS, Gemini API, Groq LLM, Prompt Engineering

Databases: PostgreSQL, Redis, SQLite

Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions

Frontend: JavaScript (ES6+), React, HTML, CSS, Bootstrap, Jinja2

Professional Experience

Freelance AI Automation Engineer

Apr 2026 – May 2026

Coresium — Contract

- Developed Python integrations and automated data pipelines using n8n.
- Designed robust integrations with external REST APIs.
- Built validation scripts to improve workflow reliability and reduce downtime.
- Streamlined business operations through automation.

Python Full Stack Intern

Feb 2025 – May 2025

PyGenicArc — Remote

- Led a team of 4 developers during a collaborative internship project.
- Architected and developed DailyDrop, an e-commerce platform with catalog management and role-based access.
- Implemented backend features, debugging, and API integrations.
- Worked within Agile workflows and presented project deliverables.

Projects

AI-Powered PDF Intelligence Tool | *Python, FastAPI, FAISS, Gemini API*

- Developed a document analysis application using FastAPI and Python to extract and process text from uploaded PDFs.
- Implemented a Retrieval-Augmented Generation (RAG) workflow using FAISS vector storage to index text chunks.
- Connected the system to the Gemini API to answer user queries with references to the original document pages.
- Live Demo: huggingface.co/spaces/Spidey173/insightpdf | [GitHub](#)

Zyra – Social Media Platform | *Django, Redis, PostgreSQL, Daphne ASGI, GitHub Actions, Pytest*

- Developed a Django application running on Daphne ASGI to support real-time WebSocket connections.
- Used Redis to manage live channel updates and cache database queries, reducing PostgreSQL read query counts.
- Set up automated testing with Pytest and GitHub Actions workflows for continuous integration validation.
- Live Demo: zyraa.onrender.com | [GitHub](#)

Real-Time Face Detection Streaming System | *FastAPI, WebSockets, React, MediaPipe, Docker*

- Built a low-latency video streaming system using FastAPI, WebSockets, and React for video canvas rendering.
- Integrated MediaPipe to process incoming webcam frames on the backend, detecting faces and overlaying tracking metrics.
- Containerized the application using Docker to ensure consistent environment setups.
- Live Demo: real-time-face-detection-5p44.onrender.com | [GitHub](#)

ChibiBytes – AI Content Platform | *Flask, SQLite, JavaScript, Gemini API*

- Created a web platform using Flask and SQLite to catalog media content.
- Implemented user accounts, watchlist features, and session-based authentication.
- Integrated the Gemini API to recommend content based on user preferences and watchlist history.
- Live Demo: [chibibytes-2.onrender.com](#) | [GitHub](#)

DailyDrop – E-Commerce Platform | *Python, Flask, SQLite, Bootstrap*

- Designed a relational database schema using SQLite and Flask (MVC) to manage products, users, and orders.
- Built a custom role-based access system to separate customer checkout workflows from administrative dashboards.
- Styled the user interface using Bootstrap for fully responsive product grids.
- Live Demo: [dailydrop-2faq.onrender.com](#) | [GitHub](#)

Education

Master of Computer Applications (MCA)
Jain University, Bengaluru

2025 – 2027

Bachelor of Computer Applications (BCA)
Bits Hi-Tech College, Chitradurga

Graduated: Aug, 2025
CGPA: 8.07 / 10

Certifications

Meta Full-Stack Developer Specialization - Coursera (2025)
