Summary

Python Backend Developer focused on FastAPI, Django, Flask, and AI-powered applications. Experienced in building REST APIs, WebSocket-based systems, RAG platforms, automation workflows, and scalable backend services. Passionate about backend engineering, AI infrastructure, and developing production-ready products.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React, Next.js

Backend: FastAPI, Django, REST APIs

Databases: PostgreSQL, FAISS, SQL

AI: RAG Pipelines, Gemini API, LLM Integrations

Cloud & Tools: AWS, Docker, Git, GitHub Actions

Experience

Freelance AI Automation Engineer

Apr 2026 – May 2026

Coresium (Contract)

- Developed automation workflows using n8n and REST APIs for client operations.
- Implemented validation and monitoring scripts to improve workflow reliability and data consistency.
- Integrated third-party services with backend systems to automate business processes.

Python Full Stack Intern

Feb 2025 – May 2025

PyGenicArc (Remote)

- Coordinated a team of 4 developers during development of a full-stack e-commerce application.
- Architected and developed *DailyDrop*, implementing product management, authentication, and role-based access control.
- Built backend modules, REST API integrations, and database-driven features using Python and SQL.
- Collaborated in Agile development cycles, contributing to debugging, testing, and project delivery.

Projects

InsightPDF | *FastAPI, Next.js, TypeScript, FAISS, Gemini API*

GitHub | Live Demo

- Built an AI-powered document intelligence platform that transforms PDFs into a searchable knowledge base using RAG and vector search.
- Increased response relevance by combining FAISS retrieval with Cross-Encoder reranking and citation verification.
- Developed end-to-end product features across FastAPI and Next.js, including document ingestion, semantic search, real-time processing, and analytics dashboards.

Zyra | *Django, PostgreSQL, Redis, WebSockets*

GitHub | Live Demo

- Created a social media platform with profiles, posts, notifications, and follower management.
- Added automated testing and CI/CD pipelines using Pytest and GitHub Actions.

DailyDrop – E-Commerce Platform | *Flask, SQLite, Bootstrap*

GitHub | Live Demo

- Created an e-commerce platform with authentication, product management, shopping cart order processing and administrative dashboards.
- Designed the database schema for users, products, and orders using SQLite.

Education

Master of Computer Applications (MCA)

2025 – 2027

Jain University, Bengaluru

CGPA: 8.45 / 10

Bachelor of Computer Applications (BCA)

2022 – 2025

Bits Hi-Tech College, Chitradurga

CGPA: 8.07 / 10

Certifications

Meta Full-Stack Developer Specialization — Coursera (2025)
